RESEARCH INTERESTS SUMMARY

Anthropology of agriculture, history of plantation systems, race studies, memory studies, politics of agricultural technology and practices, economic anthropology, science and technology studies, environmental anthropology, kinship, climate change, United States South

RESEARCH DETAIL

Current dissertation research is supported in by the Wenner-Gren Foundation and the Washington University in St. Louis Center for Humanities. It focuses on legacies of the plantation persistent in industrial agriculture; how historical legacies of racial discrimination permeate farming practices in white and non-white farmers in the American South; and the lingering effects and memories of the 1795 Pointe Coupée slave conspiracy (Louisiana).

2022-2023 (anticipated)	Anthropological and historical dissertation research, primarily Louisiana, USA <i>16-month (September 2022 – December 2023) ethnographic and archival research with farmers in Louisiana. Conduct interviews and participant observation with farmers representative of different race, class, and gender. Conduct archival research to unpack the stories of key farm families from the plantation era to the present. Conduct survey of approximately 61,000 farmers in counties along the Mississippi River, from Missouri to Louisiana, to contextualize and interrogate plantation legacies spatially. Develop a digital archive to communicate findings with the communities engaged, academic audiences, non-academic audiences, policymakers, advocacy groups, and others. This is an ongoing project.</i>
2021	Anthropological research, Louisiana, USA <i>Two-month ethnographic research with industrial row-crop farmers in Parishes across Louisiana, including unstructured interviews with farmers, farm managers, technologists, technology support staff, landowners, downstream commodity processors (for example, sugar cane millers), historians, and others.</i>
2020	Anthropological research, St. Louis Missouri, USA <i>Three-month exploratory ethnographic research into industrial agriculture technology developers, marketers, and farmers. This stage of research was interrupted by the Coronavirus Pandemic.</i>
2013	Anthropological research, Banjul, The Gambia <i>One-month ethnographic research with market managers and vendors in Serrekunda and Bakau Markets in Banjul.</i>

PREVIOUS WORK EXPERIENCE

2015-present	Management Consultant, Accenture Federal Services, Washington, D.C.
